The institution generally agrees to a specified loan amount, part of which will be disbursed to the borrower at the inception of the project and part of which will be disbursed as construction progresses, based on specified milestones that were agreed to by the institution and the borrower. Construction loans are generally made for the construction period only, which generally runs from one to seven years. Often, both interest and principal are payable at maturity. After construction is completed, the borrower usually obtains long-term mortgage financing from another financial institution. Large commercial real estate and construction loans may involve more than one lender</p> | |

Repayment terms for residential mortgage loans may vary considerably. Such loans may be structured to provide for full amortization of principal, partial amortization with a balloon payment at a specified date, or negative amortization. Interest rates may be fixed or variable. Variable-rate loans generally are referred to as adjustable-rate mortgages (ARMs). In addition, institutions may require borrowers in certain circumstances to purchase private mortgage insurance to reduce the institution's credit risk.</p> | |

Interest rates may be fixed or variable, and the loans may be structured for full, partial, or no amortization of principal (that is, periodic interest payments are required and the principal is to be paid in full at the loan maturity date). Some give the institution recourse to third parties, who guarantee repayment of all or a portion of the loans. | 51 | D | I | T | Monetary | usfr-fst | <p>Loans Held in Portfolio - Trade Financing</p> <p>Trade Financing (Terse Label)</p> <p>LoansLoansHeldPortfolioTradeFinancing</p> <p>Trade financing is a specialized area of commercial lending frequently used by businesses that engage in international activities. Such financing includes open account financing, sales on consignment, documentary collections, advances against collections, letters of credit, bankers' acceptances, factoring, and forfeiting. Banks and savings institutions charge fees for such arrangements. The most commonly used of these arrangements is the letter of credit. The two primary types of letters of credit are the commercial letter of credit and the standby letter of credit. A commercial letter of credit represents a commitment by a bank or savings institution (the issuing institution) to make payment for a specified buyer (the importer) to a specified seller (the exporter) in accordance with terms stated in the letter of credit. Under a standby letter of credit, the issuing institution guarantees that the buyer will make payment. The issuing institution is not ordinarily expected to make payment; however, if it does make payment, the buyer is obligated under the agreement to repay the institution. Standby letters of credit are also used to guarantee the performance of U.S. companies under contracts with foreign corporations and foreign or domestic governments. Depending on the nature of the agreement, these transactions may involve a high degree of credit risk.</p> | |

Commonly, such loans are made to finance purchases of consumer goods, such as automobiles, boats, household goods, vacations, and education. Interest rates and terms vary considerably depending on many factors, including whether the loan is secured or unsecured. The two most significant kinds of consumer lending are installment loans and revolving credit arrangements (credit-card lending). These loans are also referred to as installment loans to individuals.</p> | |

Such loans may contain certain risks, not associated with domestic lending, such as foreign exchange and country or transfer risks. This type of lending exposes the institution to cross-border risk, which is the possibility that the borrowing country's exchange reserves are insufficient to support its repayment obligations.</p> | |

For investments in debt securities disclose information about the contractual maturities and the fair value and net carrying amount of debt securities by the following time periods: within 1 year, 1-5 years, 5-10 years, and after 10 years. For each period results of operations are presented, the following is often disclosed: 1) the proceeds from sales of available-for-sale securities, 2) gross realized gains and losses, 3) the basis on which the cost of a security sold was determined, 4) gross gains and losses included in earnings from transfers of securities from the available-for-sale category into the trading category, 5) the amount of net unrealized holding gain or loss on available-for-sale securities in accumulated comprehensive income and amount reclassified out, 6) the portion of trading gains and losses in which trading securities are still held. For sales of or transfers from securities classified as held-to-maturity, the following is often included: net carrying amount of the security, net gain or loss in accumulated other comprehensive income that hedged forecasted acquisitions of these securities, realized or unrealized gain or loss at the date of sale or transfer, and the circumstances leading to the decision to sell or transfer the security.</p> | <p>FASB Current Text (CT) I80 118 (Standard); FASB Current Text (CT) I80 119 (Standard); FASB Current Text (CT) I80 121 (Standard); FASB Statement of Financial Accounting Standard (FAS) 115 20 http://www.fasb.org/pdf/fas115.pdf 2004-08-01 (Standard); FASB Statement of Financial Accounting Standard (FAS) 115 21 http://www.fasb.org/pdf/fas115.pdf 2004-08-01 (Standard); FASB Statement of Financial Accounting Standard (FAS) 115 22 http://www.fasb.org/pdf/fas115.pdf 2004-08-01 (Standard); FASB Statement of Financial Accounting Standard (FAS) 133 534 h http://www.fasb.org/pdf/fas133.pdf 2004-08-01 (Standard)</p> |

Disclosure requirements for defined benefit plans are divided into three sections: public entity disclosures, non-public entity disclosures, and disclosures applicable to all entities. Public entity disclosures for defined benefit pension and postretirement benefit plans often include: 1) a reconciliation of beginning and ending balances of the benefit obligation for all balance sheets presented, 2) the effects on benefit obligation during the period attributable to certain elements (e.g. service and interest costs, contributions by plan participants, actuarial gains and losses, foreign currency exchange rate changes, and benefits paid, 3) a reconciliation of beginning and ending balances of the fair value of plan assets for all balance sheets presented, 4) the effects on pension assets during the period attributable to certain elements (e.g. actual return on plan assets, foreign currency exchange rates change, contributions by employer and participants, and benefits paid), 5) net periodic benefit cost recognized as expense by components (e.g. service and interest costs, expected return of plan assets, amortization of unrecognized transition obligation or asset, recognized gain or loss, prior service cost, gain or loss due to settlement or curtailment), 6) the funded status of the plan, 7) amounts recognized and not recognized (e.g. prior service cost, gain or loss) in the balance sheet, and 8) the effect of a one-percentage-point increase and decrease in the assumed health care cost trend rate(s). Nonpublic entity disclosures for defined benefit pension and postretirement benefit plans often includes: the benefit obligation, the fair value of plan assets, the funded status of the plan, employer contributions, participant contributions, benefits paid, net periodic benefit expense and the amounts recognized in the balance sheet (e.g. net pension asset or other postretirement benefit prepaid assets or accrued liabilities, intangible asset recognized (pension plans only), and the amount of accumulated other comprehensive income recognized (pension plans only) and effect of significant nonroutine events, such as amendments, combinations, divestitures, curtailments, and settlements. Disclosures applicable to all entities for benefit pension and postretirement benefit plans include: 1) other comprehensive income from a change in the minimum pension liability recognized, 2) the weighted-average assumed discount rate, the weighted-average rate of compensation increase, and the weighted-average expected long-term rate of return on plan assets, 3) the assumed health care cost trend rate(s) for the next year used to measure the expected cost of benefits and its pattern of change, and 4) the amounts and types of securities of the employer and related parties included in plan assets. For Defined Contribution Plans, disclosures include: the nature and effect of significant matters affecting comparability of information for all periods and the amount of cost recognized as expense during the period. For Multiemployer Plans, additional disclosures include: if it is either probably or reasonably possible that 1) an employer would withdraw from a multiemployer plan resulting in an obligation, and 2) an employer's contribution to a multiemployer plan would be increased to maintain a level of benefit coverage (OPEB only).</p> | <p>FASB Current Text (CT) P16 150 (Standard); FASB Current Text (CT) P16 153 (Standard); FASB Current Text (CT) P16 162 (Standard); FASB Current Text (CT) P16 166 (Standard); FASB Current Text (CT) P40 169 (Standard); FASB Current Text (CT) P40 172 (Standard); FASB Current Text (CT) P40 173 (Standard); FASB Current Text (CT) P40 178 (Standard); FASB Current Text (CT) P40 198 (Standard); FASB Statement of Financial Accounting Standard (FAS) 132</p> <p>http://www.fasb.org/pdf/fas132.pdf 2004-08-01 (Standard); FASB Statement of Financial Accounting Standard (FAS) 132 9</p> <p>http://www.fasb.org/pdf/fas132.pdf 2004-08-01 (Standard)</p> |

Disclosure of contract accounting often includes methods used to 1) account for long term construction contracts (e.g. percentage of completion or completed-contract method) and 2) determine earned and cost of revenue. When percentage of completion method is used, disclose the method to measure the progress toward completion. For completed contract method, disclose the specific criteria used to determine when a contract is substantially completed.
