UK Customs and Tax Department recognizes Fujitsu Interstage XWand as iXBRL Conversion Software Application

SUNNYVALE, CALIF., March 24, 2011 – Fujitsu (http://solutions.us.fujitsu.com) today announced that the United Kingdom's customs and tax department, HM Revenue & Customs (HMRC) has officially recognized Fujitsu as an Inline eXtensible Business Reporting Language (iXBRL) commercial software supplier. The recognition by HMRC signifies that Fujitsu Interstage® XWand® and the iXBRL files produced by the software have both passed the extensive and rigorous tests of the HMRC. HMRC has mandated that all UK-based companies and organizations file Company Tax Returns online in iXBRL format starting April 1, 2011 for any accounting period ending after March 31, 2010. Fujitsu is listed as a provider of iXBRL Conversion Software Application on the HMRC website.

Fujitsu has aggressively led the development and adoption of XBRL standards and technologies for many years. Fujitsu Interstage XWand is the outcome of those pioneering efforts and is a market-tested solution used by regulators, auditors, filers, analysts, and enterprises in more than 25 countries around the world. Renowned for its robustness, full adherence to the XBRL specification and versatility, Interstage XWand facilitates the integration of XBRL within financial processes, boosting the level of automation and transparency throughout the entire financial reporting cycle – from creation and validation to consumption.

"Fujitsu is pleased to be recognized as an iXBRL software provider by HMRC", said Tsune Yoshizawa, senior vice president, Platform Products, Fujitsu America, Inc. "Interstage XWand provides the most advanced and complete XBRL solution on the market that makes creation and validation of iXBRL documents for submission to the HMRC and other regulatory bodies dramatically more efficient and cost-effective."

Interstage XWand, users are able to quickly create iXBRL documents from Word documents and readily validate the associated XBRL instance document. By utilizing the Interstage XWand engine, our partners are able to rapidly embed XBRL and iXBRL functionality within their applications and provide a differentiated offering in the market. Fujitsu's support for iXBRL validation builds on already proven completeness and reliability of XBRL support provided by Interstage XWand.

To rapidly develop XBRL-enabled solutions, ISVs, filling agencies, auditors, and other professional service providers can leverage extensive resources of the Interstage Partner Program to gain the best and most complete XBRL coverage within their products. Support for all aspects of the latest XBRL specifications, including iXBRL, ensures that Fujitsu partners leverage the full power of XBRL without investing in additional resources. A number of Fujitsu partners are already using Interstage XWand capabilities to deliver XBRL-enabled solutions to market, including Merrill Corporation, Tagetik, and Trintech, Inc.

Trintech has also been recognized by the HMRC as an iXBRL software provider. The recognition of Trintech and Fujitsu was the result of joint efforts by the two companies that leveraged financial and technical expertise of Trintech and built on the XBRL technology and product capabilities of Fujitsu Interstage XWand.
