

Implementation Guidance Task Force

Purpose

The Implementation Guidance Task Force (IGTF) is a working group of the XII Best Practices Board. The purpose of this task force is to create guidance for implementing XBRL Solutions. The guidance covers all stages of the implementation process based on existing worldwide experience gathered from the global community. Focused around the business aspect of the implementation process, the guidance is intended to help improve and simplify XBRL implementations.

IGTF Guidance Published

- [How to prepare and publish filing rules](#)
- [Implementing Business Validation Rules](#)
- [Taxonomy Publication and accompanying Documentation](#)
- [Positive and Negative values in XBRL](#)
- [Enumerations in XBRL](#)
- [Practice Profile: Table Linkbase](#)
- [Practice Profile: Taxonomy Packages](#)
- [Practice Profile: Assertion Severity](#)

Who should join?

- Consultants advising XBRL implementers
- XBRL project managers
- Programme support/ engagements managers
